

Claims

1. A thin film composition comprising
 - (a) a film layer including a top outer surface and a bottom outer surface; and,
 - (b) a coating on at least one of said outer surfaces of said film layer comprising at least one composition selected from the group consisting of oils, herbs, and tree and plant components and extracts.
2. A method of treating a patient that has a cough, comprising the steps of
 - (a) preparing at least one dissolvable film layer including a film forming composition and free of oils, herbs, tree and plant components and extracts, and medicants; and,
 - (b) administering said film layer in the mouth of the patient to dissolve at least a portion of said film layer.
